

# Adherence from Start to Finish

Rx Savings Solutions helps members take prescribed medications on schedule and as directed—for better health outcomes and to lower the \$100-\$300 billion in avoidable healthcare costs attributed to nonadherence.<sup>1</sup>

1

## Start With Affordability

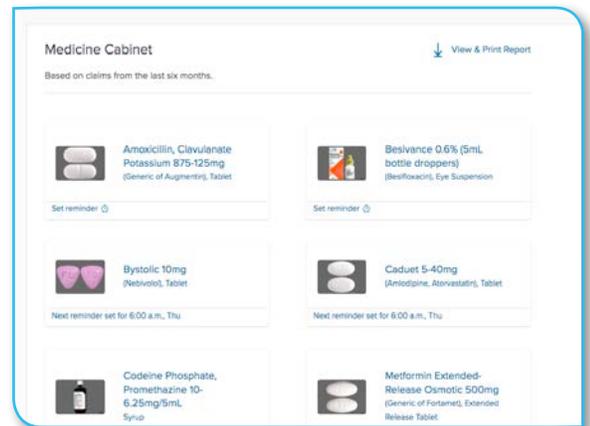

Patients are more likely to adhere when they can afford the drugs they're prescribed. Our patented software, 27,000+ pharmacist-curated savings suggestions, and proactive notifications ensure members can find the **lowest-cost therapies**.

2

## Stay Organized

The **Medicine Cabinet** feature organizes all member prescriptions into one virtual display. Medication names, strength, dosage and quantity are populated automatically based on claims. No manual entry required—and no chance for clinical error.

3

## Keep Doctors Informed

**Medication Reports** allow members to easily download, print, send or view the complete list of all medications—each with associated savings suggestions—prior to or during a doctor visit, or while at the pharmacy counter.

# 125,000

Preventable deaths attributed to medication nonadherence annually<sup>2</sup>

# 50%-60%

Typical adherence rates for Americans with hypertension, diabetes and other chronic conditions<sup>2</sup>

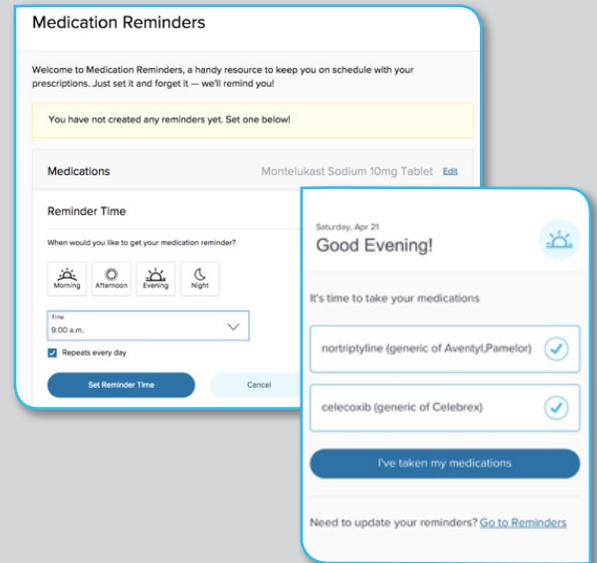

# +10%

Adherence improvement for registered vs. non-registered Rx Savings Solutions members<sup>3</sup>

# 4

## Set a Friendly Reminder

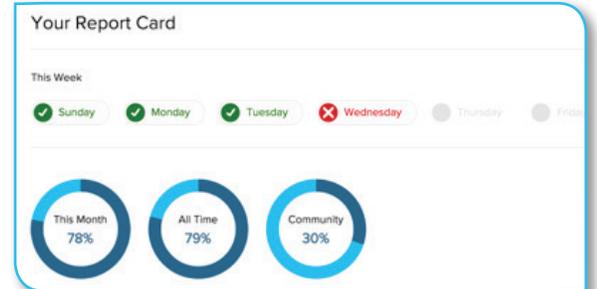

“I forgot.” That’s how 52% of respondents answered when asked by researchers why they missed a dose of a prescribed drug.<sup>4</sup> The **Medication Reminders** feature allows members to set convenient and customized text or push notifications reminding them to take everything in their Medicine Cabinet.

# 5

## Track the Stats

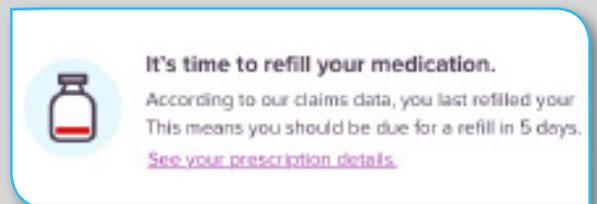

The **Report Card** feature helps members follow their adherence statistics for a given month and over their entire duration on the medication. They can also see how they measure up against the Rx Savings Solutions member community.

# 6

## Refill and Repeat

Members are alerted as refill dates approach or are past due. Physician reports show a member’s adherence over the past 12 months, giving a member and their provider(s) a quick view of refill history.
